

JOHAN EVERS

AX ARCHITECT & PROJECT MANAGER

PROFILE

Driving a professional AX project requires a professional attitude of all the people involved. Things must be done the right way and priority for a reason. That also requires knowledge and experience.

I am educated in computer science and business administration and have been working with ERP for the past 15 years while Dynamics AX for the past 10 of them working with versions from 2.5 until AX7/Dyn365. Now I manage ERP projects and have previously worked as both consultant and developer which gives me a needed ballast when working as a project manager or solution architect.

At home I have three daughters at 7, 11 and 14 years and a 1 year old son. I like to run in my spare time and I don't mind travelling as part of my job.

I am from 1977. I speak Danish (native), Norwegian (fluent), English (fluent) and basic German. I understand Swedish fully and speak some
