

Birthe Kolling Hansen

D365 Supply chain Consultant

PROFILE

I have been working on various ERP projects within logistics, sales and purchase the last 20 years, 8 of them with AX/D365.

Today I work mainly with the supply chain but my background in finance has given me a broad understanding of many kinds of businesses and has been a great asset in my work as an AX / D365 business consultant. It's easy for me to understand the challenges in a business and to see where rationalizing can lead to solutions that improve the value chain.

This has among others lead for me to have the overall solution architectural responsibility for Fatland AS, the largest butchery chain in Norway, and later NDI A/S a large Scandinavian tire imports and car repair shop company in Denmark, Sweden, Norway and Finland.

Seen from both a customer and MS Partner perspective I have been through complete ERP projects from start until end and been a key player from analysis to go-lives and since AX 2012 arrived I have been working only with AX 2012 and D365 for Tectura as a MS Partner and NDI A/S and Bestseller as large international customers. My primary responsibilities has been SCM as in logistics, sales, purchase and production.

My motivation is the versatile and complex issues often encountered in an ERP project and I thrive in an energetic work environment where cooperation is a natural part of the daily work process.

Born 1956

Family: 2 sons, 1 daughter and grand children.

- Production, discrete and process manufacturing AX 2009, 2012
- Integrations AX 2012, D365

BUSINESS EXPERIENCE

2018 January - 2018 July
D365

Position: Logistics D365 consultant

Company: AX Professionals

Client: Bestseller

Place: Brande, Denmark

Bestseller is a leading fashion industry company having multiple brands like Selected, VILA, Jack & Jones, Vero Moda etc.

As a logistics consultant for Bestseller I work primarily with the logistics manual warehouse processes related to migrating from the legacy ERP system to Dynamics 365 and integrations towards the automated warehouse system that handles more than 50.000 packages a day. It's high volume and there are no room for errors in these kinds of scenarios.

2013 - 2017 December
2012 R3

Position: Solution Architect

Company: NDI A/S

Place: Scandinavia

Employed directly at the customer I had the overall solution responsibility for sales, purchase and logistics for the tire imports company and their car repair shops in Denmark.

I had the solution responsibility of implementing first the AX Supply chain solution for the 18 warehouse and office facilities in Scandinavia then the customized car repair shop solution for the 60 car repair shops.

2011 - 2012

2012

Position: AX Functional consultant

Company: Tectura Denmark

Place: Vejle

Maintenance of various customers of Tectura until Tectura closed.

Primary projects:

- Permobil (wheel chairs) - AX 2012 supply chain
- Sirena (Sea food supplier) - AX 2012 supply chain

1997 - 2011

2009

Position: ERP Business consultant

Company: Columbus (originally Guidex but merged with Columbus in 2009)

Client: Various clients

Place: Scandinavia

Selected projects:

Fatland AS (Norways largest butchery chain)

- Butchery solution: Analysis, design, test and go-lives for 4 butcheries in 8 months having a complete working butchery solution
- Distribution project: Creation of a sales and distribution company with logistics terminals for packing and shipping. Savings first year 24 mill. NOK
- Tracking project: Tracking in the production and logistics from entrance to consumer in the food industry is a must.

Lemvigh-Müller A/S

- United ERP system of 12 independent companies. Focus on quick go-lives and was done in 2 years for 12 companies.
- Central warehouse: Automated intercompany trading and savings on reduction of the warehouses.
- Merger of companies
- Steel division converted to one company with standardization of administration, sales and

purchase

Global Fish AS (Norwegian fish exporter)

Implementation project consisting of

- Automated data capture of 7 independent production plants
- Establishment of shared sales company
- Fully automated intercompany trade
- Production overview and quality assurance
- Automated tracking and control of shipments
